

interzero[®]

zero waste solutions

Licensing with vision: With the climate-friendly tariff - **Climate Pro.**

Interzero's **Climate Pro** tariff enables you to compensate the climate-damaging emissions caused by the recycling of your packaging - **simply and unbureaucratically.**

We support you

We analyse your packaging volume and advise you on the choice of funded projects.

For a world without waste.

interzero[®] Climate Pro

Your advantages:

- You bring your company a step closer on the road to **climate neutrality.**
- The volume of your CO₂ compensation is shown annually in your **Climate Pro confirmation.**
- Integrate the proof of your commitment into your **PR and advertising** activities in a publicity-effective way.

interzero®

Climate Pro

We support you on your path to climate neutrality

Why Climate Pro?

The climate-friendly licensing tariff from Interzero supports your company on the way to a sustainable circular economy. Because:

Greenhouse emissions are generated during the transport, sorting and recycling of your collected packaging. These emissions are converted to CO₂ equivalents - a measure to standardise the climate impact of different greenhouse gases.

You will receive an annual "Climate Pro" certificate, which recognises your commitment to environmental protection and your offsetting performance.

How does Climate Pro work?

As part of the licensing process, you choose climate protection projects that you would like to support with a share of the licence fee. These climate protection measures are used to offset the emissions produced. In this area, Interzero works together with Climate Austria, a partner with many years of experience in climate protection projects.

Climate Austria is a project of KPC (Kommunalkredit Public Consulting GmbH) and supports high-quality climate protection projects at national and international level. The "Climate Austria" initiative was launched in 2008 as a co-operation between the Ministry of the Environment, Austrian Airlines, Vienna Airport and KPC. By choosing the Interzero Climate Pro tariff, you are making an important contribution to climate protection and the UN climate protection goals ("SDGs").

CLIMATEAUSTRIA

Ein Produkt der KPC

Climate-friendly licensing as part of the Climate Pro tariff is carried out in cooperation with our partner **Climate Austria**.
